

### RP hermetic 50 steel panel fire door

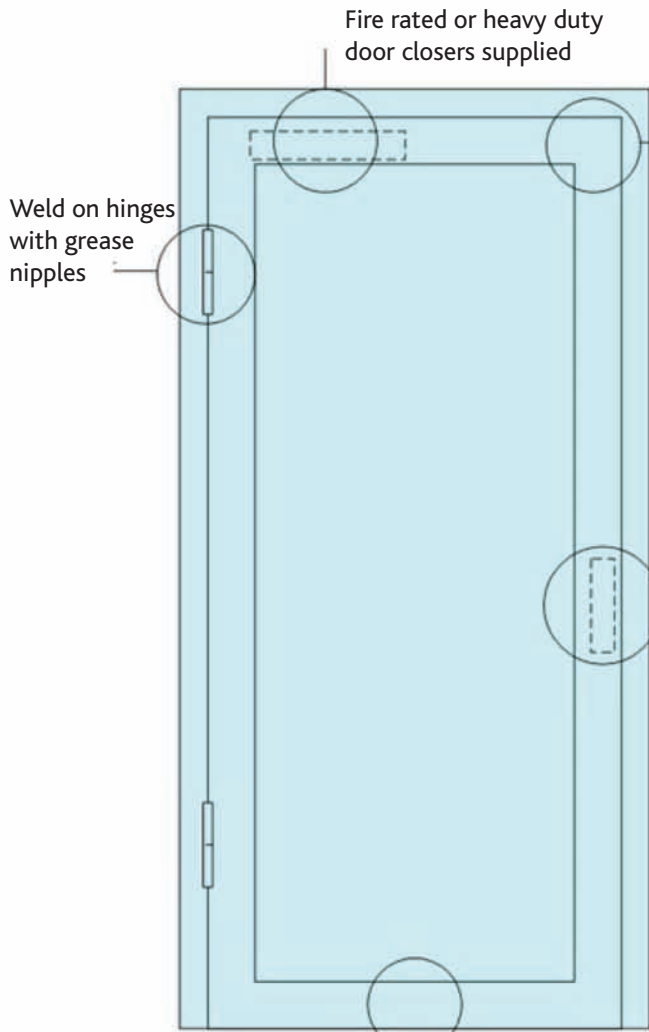

60 minutes integrity  
Fire rates steel security door

ASD Architectural are specialist system suppliers of steel door and fenestration systems to metal fabricators. Always adding to the comprehensive range of solutions, the RP hermetic 50 steel panel door provides the fabricator with a simple yet robust system with added performance criteria

- Bodycote Warrington Fire Report WFRC no. C101072.
- Steel profiles are mitred and welded for maximum strength and rigidity
- The welded construction is superior to pressed and folded metal doors, as there is no likelihood of warping or deformation
- Steel plates and mineral wool insulation add impact resistance and fire integrity
- Approved and compatible ironmongery supplied
- High levels of resistance to vandalism and misuse.
- Huge range of applications including: factory units, store rooms, schools and colleges, hospitals, public building, public utilities.

**Strength   Durability   Performance**
