

The slide rail WP W 08-05 would be alternatively pressed with the upper slat or could be bolted with the lower slat during the assembling

The new slide rail WP 08-05  
(see yellow illustration) enhance slide of the  
surface / soil sealing and simplify the handling ...

... of the assembling and disassembling of the slats.  
The slide rail could be upgraded or refit at any time  
even with already installed objects.
